

## Children aged 16 and under for Drugs Offences (Offender Based)

The workbook contains data for the past three financial year relating to drugs offences where the persons dealt with were aged 16 and under. This workbook therefore provides data for the crimes that were established (i.e. the drugs were forensically identified), it is not arrest based data. Data for all drugs offences has been provided, including the offences possession and possession with intent to supply, along with other drug trafficking offences.

All calculations within this workbook are based on the Home Office Counting rules. Therefore, the figures/data for each financial year stands as it was at the end of that specific financial year. No events that happened after the end of the financial year are shown. This is not live data. (The reason for this being that comparisons could not be made between FY's if live data was used, for offences committed back in 2003 would have had a longer time for the offence to be detected, compared to those recorded in 2006.)

This workbook contains 3 worksheets:

- 1) **FY 05-06** - This worksheet provides the raw data for all persons linked to a drugs offence who were aged 16 and under during the financial year 2005/06. The age of the child, class and type of substance, borough where the offence was committed, offence established, and the police disposal are available for each child. A summary table is available at the bottom of each spreadsheet providing totals for where the offence established was possession, and also where the offence established was possession with intent to supply.
- 2) **FY 04-05** - This worksheet provides the raw data for all persons linked to a drugs offence who were aged 16 and under during the financial year 2004/05. The age of the child, class and type of substance, borough where the offence was committed, offence established, and the police disposal are available for each child. A summary table is available at the bottom of each spreadsheet providing totals for where the offence established was possession, and also where the offence established was possession with intent to supply.
- 3) **FY 03-04** - This worksheet provides the raw data for all persons linked to a drugs offence who were aged 16 and under during the financial year 2003/04. The age of the child, class and type of substance, borough where the offence was committed, offence established, and the police disposal are available for each child. A summary table is available at the bottom of each spreadsheet providing totals for nominals where the offence established was possession, and also where the offence established was possession with intent to supply.
